ABSTRACT

This document sets out the requirements for preparing and submitting manuscripts for publication in the Proceedings of the Iron Control in Hydrometallurgy Symposium. In order to obtain a proceedings volume with a consistent and professional appearance, it is essential that all manuscripts conform to these instructions. This “author friendly” document itself serves as an example of a correctly prepared manuscript, and provides you with a sense of how your paper will appear in the finished volume.
INTRODUCTION

Your manuscript must be submitted by **March 15, 2006** to J.E. Dutrizac at the address given in the SUBMISSION OF MANUSCRIPTS section of this document. Your draft manuscript will be subjected to peer review. The final acceptance of your paper is conditional upon approval of the Editorial Board. Refer to the SUBMISSION OF MANUSCRIPTS section of this document for full details on manuscript submission.

For a paper to be included in the symposium proceedings, one of the authors must register for the conference, return the attached Copyright Form, and present the paper.

The manuscript should not exceed 15 pages in length, including text, figures, tables and references, and must be prepared in proper English. SI units or acceptable metric equivalents should be used throughout. Your electronic file should not exceed 3 megabytes.

These instructions will enable you to prepare your manuscript in an electronic form, ready for reproduction. It is therefore essential that these instructions be carefully followed.

**PREPARATION OF THE MANUSCRIPT**

Prepare your manuscript using Microsoft (MS) Word for Windows as your word processing software. To ensure that your manuscript has an identical appearance when viewed on almost any computer, you should avoid the use of a two-byte code for Chinese characters, etc.

**Page Size and Layout**

Your manuscript should be prepared for either North American letter-size (8.5 x 11 inches) paper or European A4-size (210 x 297 mm) paper. Use the margin settings specified in Table 1, and do not number the pages of the paper.

<table>
<thead>
<tr>
<th>Margin</th>
<th>Letter (8.5 x 11 inches)</th>
<th>A4 (210 x 297 mm)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Top</td>
<td>2.90 cm (1.14 inches)</td>
<td>2.90 cm (1.14 inches)</td>
</tr>
<tr>
<td>Bottom</td>

<td>2.90 cm (1.14 inches)</td>
</tr>
<tr>
<td>Right</td>
<td>3.20 cm (1.26 inches)</td>
<td>2.90 cm (1.14 inches)</td>
</tr>
</tbody>
</table>

**Type Style and Spacing**

All headings and text should be typed in a Times New Roman font in black. Use 12 point type size throughout your manuscript, including the title.
The title page of your manuscript is illustrated by the first page of these instructions. The title page must not exceed one (1) page in length. It contains:

- The title of the paper in **bold** 12 point Times New Roman, centered with all letters in capitals; the title should begin on the 5th line from the top margin;
- The author’s name, separated from the title by a single blank line (12 points), centered, in regular Times New Roman, with the first letter of each part of the name capitalized;
- If applicable, the name(s) of co-author(s) having the same organizational affiliation are placed on the same line and in the same format as the first author’s name, with the names separated by “and”, or commas plus “and”;
- The author’s affiliation and address, immediately below the name, centered and single-spaced, in *italic* Times New Roman;
- If applicable, the names of other authors, having different affiliations and addresses, in the same format used for the first author, with each author entry separated by a blank line (12 points);
- The major heading **ABSTRACT**, centred, with all letters capitalized, in bold Times New Roman, separated from the last author entry by 2 blank lines;
- The body of the abstract should not exceed 200 words in length, in regular Times New Roman, fully justified, separated from the heading **ABSTRACT** by one (1) blank line and indented. The abstract should be a single paragraph.

The body of the paper begins at the top of the second page of the manuscript. Any space remaining on the first page, after the abstract, is left blank.

**Headings**

All headings are in 12 point Times New Roman type. The manuscript will typically have three levels of headings: major, second-level and third-level.

Major headings, such as **ABSTRACT, INTRODUCTION, EXPERIMENTAL, DISCUSSION, CONCLUSIONS, ACKNOWLEDGEMENTS, REFERENCES**, are centred and bold-faced, but not underlined, and are entirely in capital letters. The body of the paper begins with a major heading (for example, **INTRODUCTION**) which is placed at the top of the second page of the manuscript. Subsequent major headings are separated from the text above and below them by one (1) blank line; they do not begin a new page unless it is strictly required.

Second-level and third-level headings have the initial letter of each major word capitalized and are positioned at the left margin. Second-level headings are bold-faced. Third-level headings are underlined. Both are separated from the text above and below by one (1) blank line.
Text

Text paragraphs should be single-spaced (line height of 6 lines per inch) and fully justified, with the first line indented 1.27 cm (0.5 inch). Paragraphs are separated with a blank line.

Footnotes

The use of footnotes is strongly discouraged. All information should be incorporated into the body of the paper.

Equations and Symbols

Simple mathematical expressions and sub- and super-scripted characters, such as $\text{SO}_4^{2-}$, should be embedded in the text.

Equations should be placed on separate lines, centred and numbered consecutively in parentheses at the right-hand margin. A blank line precedes and follows each equation. For reactions, use the Times New Roman (normal text) arrow (Equation 1a), but an equal sign may be substituted (Equation 1b). Use a dash rather than a hyphen for the minus sign.

\[
\text{ZnS} + \frac{3}{2}\text{O}_2 \rightarrow \text{ZnO} + \text{SO}_2 \quad \quad (1a)
\]

\[
\text{ZnS} + \frac{3}{2}\text{O}_2 = \text{ZnO} + \text{SO}_2 \quad \quad (1b)
\]

\[
E = 1.23 - 0.06 \text{pH} \quad \quad (2)
\]

The nomenclature and units for symbols should be defined in the text or, where the number of symbols is large, in a special section, NOMENCLATURE, at the end of the paper.

Figures

Figures including graphs, such as Figure 1, line drawings, photographs and other illustrations should be in black and white only with sharp contrast, with all lines and lettering large enough to remain legible after 20% reduction. For microstructures and similar figures, be sure to place a scale marker on the photograph. Avoid the use of frames around the figures, as well as the use of shaded backgrounds which do not reproduce well. Excel charts should have black and white symbols and lines only.

Figures, especially photographs and SEM micrographs, can significantly increase the size of the electronic file. Excessively large files tend to complicate and slow down the editing process. Therefore, you should make every effort to reduce the size of the electronic files of your photomicrographs and other graphics. To minimize your file size, add the figures (photos, photomicrographs) using the "Insert-Picture" function. For Excel charts, use the "Copy-Paste Special-Picture" sequence.
All figures should be consecutively numbered with Arabic numerals and inserted as close as possible to the corresponding text. A figure too wide to fit between the margins may be placed in landscape orientation (sideways format), on a page by itself, with the bottom of the figure to the right of the page. A caption consisting of the word “Figure,” the figure number, a dash and the figure title, in 12 point Times New Roman, should appear centred below each figure. A single blank line is used to separate a figure from its caption. Separate each figure and caption from the adjacent text with one (1) blank line. Do not use a period at the end of the figure caption.

![Graph showing the effect of iron concentration on the amount of precipitate formed during hydrolytic precipitation from waste processing solutions](image)

**Figure 1** – Effect of iron concentration on the amount of precipitate formed during hydrolytic precipitation from waste processing solutions

### Tables

Tables should be inserted as close as possible to their first citation. A large table, like a large figure, may be placed in landscape orientation (sideways format) on a page by itself. Number tables consecutively using Arabic numerals, and centre the title above the table. The word “Table” is followed by the table number, a dash, and the rest of the title. There is no line space between the title and the table itself.

Table-wide lines (horizontal ½ point thickness) should separate the title from the column headings, the column headings from the body of the table, and the table from the following text. Do not use vertical lines, and avoid the use of horizontal lines between the various rows of data. Footnotes belonging to the table should appear immediately
Table 2 – Electron microprobe analyses of sphalerite grains in the Kidd Creek “C” concentrate *

REFERENCES

All cited references should be consecutively numbered in square brackets; e.g., “as shown by Riveros [6]”. Consecutive references can be hyphenated, e.g., "as shown by several researchers [1-5]". These numbers must not be super-scripted. The complete citation must be given in the numbered list in the REFERENCES section, using a single-spaced format with a blank line between the individual references. This list is numbered in the order of citation in the text. References must provide readers with enough information to find the cited material.

In general, references should contain the initials (with no space between the initials) and names of all the authors, the title of the paper in quotation marks and with the first letter of all major words capitalized, the name of the journal, the volume number, the year, and the first and last page numbers. Reference to books should include the author, title, publisher’s name and location, year, and start and ending pages of the specific citation. References to edited books, conference proceedings, patents, unpublished papers and other items should follow the examples provided below. Note that each reference is formatted as a single-spaced, fully-justified paragraph with a hanging indent of 1.27 cm (0.5 inch). References are separated from each other by a single blank line. A period ends each reference. References to internet sites are discouraged, as these tend to change frequently.

Because unpublished sources are often difficult to obtain, reference to them is not encouraged. Authors should strive to reference published material only.

Example of the Format for Book References

Example of the Format for Edited Conference Proceedings

Example of the Format for Journal References

Example of the Format for Patent References

COPYRIGHT NOTICE

The Canadian Institute of Mining, Metallurgy and Petroleum (CIM) strictly reserves copyright and first publication rights, and the attached Copyright Form must be completed and returned with your manuscript. If the paper contains any matter from another source, it is the responsibility of the author(s) to obtain the necessary permission for the reproduction of this matter in the paper from the holder of the copyright. Acknowledgement must be given and a full reference supplied.

SUBMISSION OF MANUSCRIPTS

Your completed manuscript should be saved in MS Word. In the event that format/font changes occur during the electronic transmission of the paper, a copy of the printed manuscript or a PDF file of the paper may be requested by the editors.
You must submit the following items to J.E. Dutrizac, no later than March 15, 2006.

- MS Word file of your manuscript (via e-mail)
- One copy of your printed manuscript, if requested (via postal mail)
- The completed Copyright Form (via Fax or postal mail).

INSTRUCTIONS SUMMARY

<table>
<thead>
<tr>
<th>Word processing Software:</th>
<th>Microsoft (MS) Word</th>
</tr>
</thead>
<tbody>
<tr>
<td>Page Setup (Paper/Margins):</td>
<td>See Table 1, Section Page Size and Layout</td>
</tr>
<tr>
<td>Font:</td>
<td>Colour black, Times New Roman 12 pt. This applies to complete manuscript and all headings</td>
</tr>
<tr>
<td>First page (MANUSCRIPT TITLE):</td>
<td>Start on the 5th line from top margin at 4.4 cm (1.7”). <strong>BOLD/FULL CAPS/CENTERED</strong> between page margins. Leave (1) blank line after Manuscript Title</td>
</tr>
<tr>
<td>Author name(s):</td>
<td>Center between page margins, leave (1) blank line between authors and (2) blank lines before <strong>ABSTRACT</strong> Heading</td>
</tr>
</tbody>
</table>

MANUSCRIPT HEADINGS

<table>
<thead>
<tr>
<th>MAJOR HEADING:</th>
<th><strong>BOLD/FULL CAPS/CENTERED</strong> between page margins. Leave (1) blank line above/below <strong>MAJOR HEADING</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Second Level Heading:</td>
<td><strong>BOLD/Major Words Capitalized/Justified Left Margin.</strong> Leave (1) blank line above/below <strong>Second Level Heading</strong></td>
</tr>
<tr>
<td>Third Level Heading:</td>
<td>Underline/Major Words Capitalized/Justified Left Margin. Leave (1) blank line above/below <strong>Third Level Heading</strong></td>
</tr>
<tr>
<td>Figure headings/captions:</td>
<td>Figure 1 - Centered below figure. First major word is capitalized. There is (1) blank line between figure caption and figure. There is (1) blank line above/below figure. No punctuation after figure caption</td>
</tr>
<tr>

<td>Centered, one (1) blank line above/below equation</td>
</tr>
</tbody>
</table>

DO’S FOR WORDPROCESSING

<table>
<thead>
<tr>
<th><strong>Punctuation</strong> (Sentences):</th>
<th>Be consistent throughout manuscript. Standard spaces (2) between sentences. (1) space will be accepted. DO USE one or the other, not both.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Colon (:):</td>
<td>No space before (2) spaces after</td>
</tr>
<tr>
<td>Semi colon (;):</td>
<td>No space before (1) space after</td>
</tr>
<tr>
<td>Dashes (- -):</td>
<td>Be consistent throughout manuscript</td>
</tr>
<tr>
<td>SI units:</td>
<td>(1) space before and after (25 km)</td>
</tr>
<tr>
<td>Indenting paragraphs:</td>
<td>Do turn off indenting for Major Headings. Make sure the Major Headings are centered between left and right margins</td>
</tr>
<tr>
<td>Initials:</td>
<td>(0) spacing between initials; e.g., P.A. Riveros</td>
</tr>
</tbody>
</table>

DO’S FOR ELECTRONIC FILES

Try to reduce the size of the manuscript electronically. Clean and concise files; remove all unnecessary codes. Name your electronic files by the First Author’s Surname for example (Dutrizac Draft.doc). The manuscript will be printed in black and white only (do not use colour in your electronic file).
