Table of Contents

Foreword ........................................................................................................................................... v
Editors’ Biographies ........................................................................................................................... vii
Symposium Organizing Committee ................................................................................................. ix
Symposium Session Chairs ................................................................................................................ xi

PART 1 - OVERVIEW OF IRON CONTROL TECHNOLOGIES

Iron Control in Mineral Processing ................................................................................................. 3

Iron Control in Hydrometallurgy: The Positive Side of the Coin ................................................. 25
  C.J. Ferron

Iron Control and Management in the Zinc Industry ........................................................................ 45
  R. Beaulieu, G. Gagné, M. Nasmyth, G. Cooper and C. Inostroza

Benefits of the Presence of Iron in Uranium Processing ............................................................... 57
  E. Özberk, E.K. Lam, A.J. Oliver and C.R. Edwards

Thickened Tailings and Red Mud Disposal ..................................................................................... 77
  V.L. Mitsopoulos and M. Bélanger

Hematite Versus Jarosite Precipitation in Zinc Production ........................................................... 93
  M. Lahtinen, K. Svens and L. Lehtinen

PART 2 - ZINC OPERATIONS I

Ironing Out the Process at Canadian Electrolytic Zinc ................................................................. 111
  L. Rosato, L. Centomo, E. Benguerel, M. Dumont and D. Beaudoin

Recent Improvement in the Hematite Precipitation Process at the Akita...................................... 123
  H. Arima, T. Aichi, Y. Kudo, K. Saruta, M. Kanno and R. Togashi
PART 3 - COPPER HYDROMETALLURGY

Iron Recovery in the Sumitomo Chlorine Leach Process for Copper Concentrates ...... 191
M. Imamura, K. Takeda, K. Ando, N. Nagase and Y. Ojima

The Role of Iron in the CESL Process ................................................................. 205
J. Defreyne, W. Grieve, D.L. Jones and K. Mayhew

Iron Behavior in the HydroCopper™ Process ..................................................... 221
L. Haavanlammi, O. Hyvärinen and J. Karonen

Iron Reduction in Copper Leach Liquors Using Controlled Precipitation of ........... 231
Sulfate Species during High Temperature Pressure Oxidation of Base Metal Ores
J.C. Gathje

Precipitation of Iron Oxides from Iron(II)/(III) Chloride Media at Ambient .......... 247
Temperatures Using Caustic, Lime or Magnesia
D.M. Muir and E. Jamieson

The Oxidation of Ferrous Sulfate Solutions by S(IV) and Dissolved Oxygen .......... 263
E. Krause

PART 4 - ZINC OPERATIONS II

Current Iron Control Practice at the Kokkola Zinc Plant ..................................... 285
P. Talonen, M. Myllymäki and M. Pohjonen

Paragoethite for Iron Control at the Zinifex Hobart Smelter .............................. 297
G. Binks, D. Palmer and T. McCristal
The Behavior of Iron, Silica and Germanium in the Goethite Process .......................... 313
M. Fujikawa, T. Anzai and S. Ikenobu

Zinc Ferrite Treatment Options to Increase the Zinc Recovery at ................................. 327
Teck Cominco’s Trail Operations
M.A. Nagle, D.G. Reynolds and D.A.D. Boateng

Iron Purification at Teck Cominco’s Trail Operations................................................... 343
W.A. Jankola and H. Salomon-de-Friedberg

Recent Developments in Precious Metals Recovery, Zinc Extraction and .................... 359
Iron Control at the Zinc Plant of the Kidd Metallurgical Division
M.R. Coffin, J.D. Gillis, A.R. Leggett and G.R. Morin

Experience with Iron Control Practices and Phased Capacity Enhancement at ............ 375
Hindustan Zinc Limited, Zinc Smelter, Debari, Udaipur, India
Y.L. Mehta and G. Ram

PART 5 - NICKEL-COBALT PROCESSING

Iron Removal as Part of the Nickel Matte Leaching Process ................................. 391
M.J. Latva-Kokko

Iron Removal from the MCLE Circuit ................................................................. 403
H. Higuchi, Y. Ozaki, T. Sugiura and N. Kemori

Commissioning and Operation of the Copper Cliff Weak Acid Treatment Plant........ 415
T. Xue, J. Edwards, D. Gervais and D. Legrand

Characterization of the Iron-rich Residues Generated during the Pressure ............... 429
Oxidative Leaching of Voisey’s Bay Nickel Sulphide Concentrate
T.T. Chen, J.E. Dutrizac, G. Poirier, D.G. Kerfoot and A. Singhal

Iron Control in High–concentration Chloride Leaching Processes .......................... 445
G.B. Harris, C.W. White and G.P. Demopoulos

Iron(III) Removal from Chloride Solutions by Solvent Extraction ....................... 465
A.P. Paiva, S. Natu, M.C. Costa and K. Gajda

Laboratory Tests on the Parameters Affecting Iron Precipitation from .................... 479
Non-decopperized Nickel Anolyte
M.B. Greyver, R.D. Shestakova and A.G. Malysheva
PART 6 – ZINC OPERATIONS III

Iron Removal in the Skorpion Process ................................................................. 491
   E.A. Roux, M.J. Sechemane and S. Holtzhausen

Impurity Removal in the Jarosite Precipitation Circuit of the Electrolytic Zinc ........ 501
   Plant of Met-Mex, Peñoles S.A C.V
   C. Rocha R. and J. Ayala S.

Aluminium Control in the Iron Purification Stage of a Hydrometallurgical .......... 513
   Zinc Circuit
   I. Lackey, C.F.M. Copini and J. Van Schaik

Iron Control in Zinc Solvent Extraction: The Técnicas Reunidas Experience ........ 527
   G. Díaz, D. Martín, F. Sánchez and J.I. Lozano

A Study of Ferrihydrite Precipitation in the Zinifex Paragoethite Process .......... 539
   M. Loan, G.M. Parkinson, O.M.G. Newman and J.B. Farrow

Extraction of Iron and Other Metals from a Zinc Sulphide Leach Solution .......... 557
   S.M.C. Santos, M.R.C. Ismael, P.F.M. Correia, M.J.N. Correia,
   M.T.A. Reis, A. Deep and J.M.R. Carvalho

PART 7 – NICKEL LATERITE PROCESSING

Iron Control in the Moa Bay Laterite Operation ................................................. 573
   R.P. Kofluk and G.K.W. Freeman

Impurity Disposition and Control in the Ravensthorpe Acid Leaching Process .... 591
   D.T. White, M.J. Miller and A.C. Napier

Transformation of Iron-containing Residues in the Pressure Acid Leaching of ....... 611
   Arid Region Nickel Laterites
   D.M. Muir, B.I. Whittington, R.G. McDonald and J.A. Johnson

Iron Control in the Goro Nickel Process ........................................................... 635
   Y. Okita, A. Singhal and J.-J. Perraud

Iron Control in Processes Developed at Dynatec .............................................. 653
   I.M. Masters, L.A. Barta, J. Stiksma and M.J. Collins

New Data on Hematite Solubility in Sulphuric Acid Solutions from ................. 673
   130 to 270°C
   M. Reid and V.G. Papangelakis
PART 8 – NEW TECHNOLOGIES AND RESIDUE DISPOSAL

The Application of Ferrates to the Treatment of Textile Effluents
I. Ciabatti, F. Tognotti and L. Faralli

How to Substantially Improve the Life of a 30 Ha Tailings Pond at a Umicore Zinc Plant
S. Foged, J. Vandekeybus and G. Mentens

Environmental Aspects of the Generation and Disposal of Iron Residues at a Votorantim Zinc Refinery in Brazil
T. Takayama Filho, C. Campolina and F. Dutra

Closing of a Goethite Pond at Umicore Balen, Belgium
P. Mengé, R. Van Driessche and G. Mentens

Iron Control in the Altair Hydrochloride Pigment Process
D. Verhulst, B.J. Sabacky, J. Lang and D.K. Ellsworth

Ion Exchange for Iron Impurity Control in the Base Metal Industry
R. Shaw, S. Vance, J. Illescas, D. Dreisinger and B. Wassink

The Application of Molecular Recognition Technology for the Selective Extraction and Recovery of Iron from Hydrometallurgical and Chemical Processing Streams
N.E. Izatt, J.B. Dale, S.R. Izatt and R.L. Bruening

PART 9 – PICKLE LIQUOR TREATMENT

Recycling of Spent Acids and Iron Via Pyrohydrolysis
F. Baerhold, A. Lebl and J. Statrcevic

Biotechnological Solutions for the Treatment of Pickle Liquors
J.L. Huisman, G. Schouten and H. Dijkman

Energy Consumption for Iron Chloride Pyrohydrolysis: A Comparison Between Fluidized Beds and Spray Roasters
K. Adham, C. Lee and D. Small

Regeneration of Hydrochloric Acid Pickle Liquors by Crystallization
C.J. Brown and D.R. Olsen

Precipitation of Iron Fluoride Trihydrate from Mixed Acid Pickle Liquors
K. Österdahl, Å. Rasmuson, K. Tjus, U. Fortkamp, T. Schneiker and S. Åkesson
Metals Recovery from Stainless Steel Pickle Liquors by a Selective Precipitation Method

J. Dufour, J.L. Gálvez, C. Negro and F. López-Mateos

PART 10 – IRON FOR ARSENIC CONTROL

Co-precipitation of Arsenic with Ferric Ions: Disposal Strategy for Inco’s New Weak Acid Treatment Plant Sludge
K. Hardy, G. Greer and E. Krause

Mechanism of Scorodite Formation at Ambient Temperature as Determined by TEM Analysis
H. Itou, T. Takasu, T. Nakamura, E. Shibata and H. Tateiwa

A Comparison of Ferrihydrite and Aluminum-modified Ferrihydrite for the Removal of Arsenate from Aqueous Solution by Co-precipitation
J.W. Hohn, L.G. Twidwell and R.G. Robins

The Use of Jarosite Residues with Bauxsol™ to Remove Arsenate from Drinking Water and Industrial Waste Waters
D. McConchie, M. Clark and H. Genç-Führman

The Control of Iron and Arsenic in the Treatment of Gold Bearing Enargite Concentrates
C.G. Anderson and L.G. Twidwell
